## Introduction for K&P Gallery

How difficult it must have been for all of you from COVID-19 this August, when it should've been the beginning of summer! The whole world is suffering, due to the invisible virus and germs. The exhibition that were scheduled have been postponed indefinitely. and the possibilities of having other future exhibitions have become uncertain.

In the midst of this crisis. We are seeking to prepare exhibits online and offline. In order to find the pivotal point of the gallery culture that is in struggle, we are going to promote the artist's work not only offline at our K&P Gallery. But also online as well.

We want to help the artists whose plans have been on hold. by proceeding the exhibition. We will promote the upcoming exhibition, NEW NORMAL project, at the fullest. In order to do that. We are in need of your great support at this point.

Sincerely.

Souk Ki Kim  
Director of K&P Gallery

## ARTIST NOTE

"I create abstract images using the characteristics of light by touching the heart of the camera with my eyes armed with patience and my fingertips that embrace love. Creativity starts with breaking the existing frame. Photography is an art that expresses very realistically, but the photos I create are abstracted by omitting a lot of the details of the tree being photographed."
